ABOUT 4PL ACADEMY

4PL Academy is the learning and development arm of 4PL Consultancy, committed to shaping future-ready professionals through industry-integrated, technology-driven and globally exposed academic programmes.

Our mission is to bridge the gap between education and employability by delivering practical learning, real-world exposure and international opportunities.

WHY 4PL ACADEMY?

INDUSTRY INTEGRATED CURRICULUM

Co-created with industry experts for future workplaces.

GLOBAL EXPOSURE

International immersion, industry visits & global collaborations.

AI-POWERED LEARNING

Smart classrooms, simulations & AI-enabled tools for deep learning.

CAREER ACCELERATION

Internships, live projects & placement support for career growth.

INNOVATION CULTURE

Hackathons, startup challenges & innovation labs.

HOLISTIC DEVELOPMENT

Focus on leadership, communication & professional ethics.

OUR PROGRAMME PORTFOLIO

Industry Integrated Academic Programme (IIAP ¯) offers future-focused master-level tracks designed to meet the demands of a rapidly evolving global industry landscape.

AI & DATA SCIENCE

Build intelligent solutions with AI, ML, data analytics and deep learning.

BUSINESS & MANAGEMENT

Lead innovation, strategy and transformation in a global business environment.

COMPUTING & SOFTWARE ENGINEERING

Design, develop & deploy scalable software solutions for tomorrow.

ENGINEERING & TECHNOLOGY

Advance technologies, systems and solutions for a smarter world.

GLOBAL TRADE & SUPPLY CHAIN

Navigate global markets, trade policies and supply chain ecosystems.

LOGISTICS & OPERATIONS MANAGEMENT

Optimize operations, logistics networks and deliver value globally.

PROGRAMMES WITH REAL-WORLD EDGE

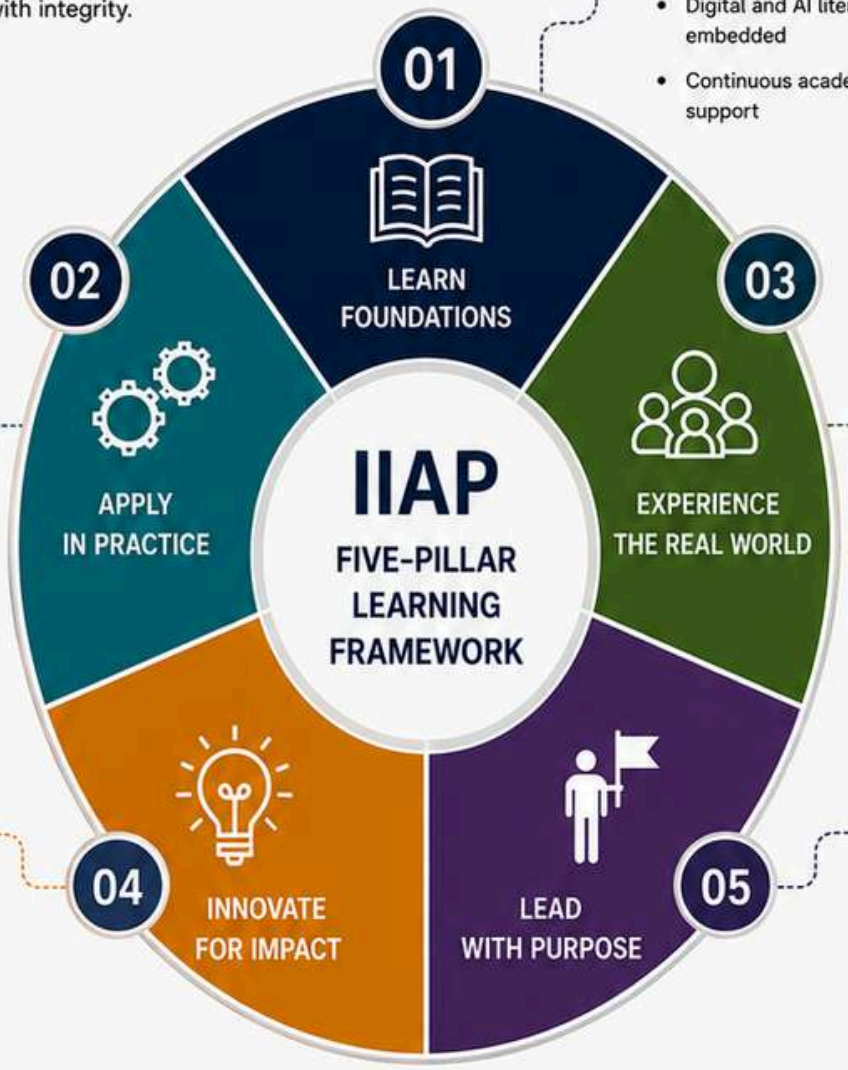

- Industry-Aligned Curriculum
- Live Projects & Case Studies
- Internships & Industry Mentorship
- Global Exposure & Collaborations
- Career Support & Placement Assistance

IIAP – INDUSTRY INTEGRATED ACADEMIC PROGRAMME

LEARN. APPLY. EXPERIENCE. INNOVATE. LEAD.

IIAP is the academic heartbeat of 4PL Academy.

It ensures that every student learns with purpose, applies with confidence, experiences the real world, innovates for impact and leads with integrity.

- Industry-relevant academic curriculum
- Conceptual clarity and strong fundamentals
- Digital and AI literacy embedded
- Continuous academic support

- Case studies and real-world scenarios
- Labs, simulations and tools
- Industry projects and assessments
- Problem-solving in action

- Internships and industry immersion
- Live projects and consulting assignments
- Industry expert interactions
- Workplace readiness from day one

- Design thinking and innovation
- AI and emerging technology exposure
- Prototype, test and iterate
- Entrepreneurial mindset

- Leadership and communication
- Ethics, sustainability and responsibility
- Global mindset and cultural awareness
- Career leadership and growth

POWERED BY ETK

International immersion & collaborations

Innovation Driven
Solutions for real-world challenges

Leaders with Purpose
Ethical, responsible and future-ready

OUR GLOBAL PRESENCE

A GLOBAL ACADEMY WITH A WORLDVIEW

4PL Academy Ltd operates with a global perspective and a strong international mindset. With roots in the United Kingdom and a presence in India, we collaborate with global industry leaders, academic partners and innovation hubs to create meaningful learning experiences for our students.

Our students benefit from international exposure, global collaborations and cross-cultural learning opportunities that prepare them to thrive anywhere in the world.

UNITED KINGDOM
Head Office
Strategic leadership, academic partnerships and global collaborations.

DUBAI
Global Connect Hub
Industry engagement, international exposure and global programmes.

MALTA
Global Learning Destination
International learning experiences and academic collaboration.

EUROPE
Academic & Industry Network
Research exchange, student mobility and global industry ties.

INDIA
Global Delivery Hub
Programme delivery, industry integration and student support.

GLOBAL OUTLOOK
International vision with real-world relevance.

STRONG PARTNERSHIPS
Collaborations with universities, industry and innovation hubs.

CULTURAL DIVERSITY
A global community that celebrates diversity.

EXPANDING FOOTPRINT
Growing presence across key global regions.

WHY GO GLOBAL?

In today's interconnected world, global exposure is key to building adaptable, culturally aware and future-ready professionals. Our international collaborations, learning destinations and industry networks ensure that our students gain a truly global perspective.

GLOBAL EXPOSURE
International immersions, industry visits and global collaborations.

INTERNATIONAL COLLABORATIONS
Partnerships with universities, industry leaders and innovation hubs.

FUTURE-READY NETWORKS
Build global connections that accelerate careers and open doors.

THE 4PL ACADEMY EXPERIENCE

BEYOND CLASSROOMS. TOWARDS LIFE.

At 4PL Academy, education goes beyond textbooks. We create a vibrant, inclusive and future-ready environment where students grow academically, professionally and personally.

From industry exposure and innovation labs to clubs, leadership programmes and wellbeing support — every experience is designed to help you discover your potential and shape your path with purpose.

> We don't just educate.
> We empower you to lead, innovate and make a global impact.

ACADEMIC EXCELLENCE

Rigorous curriculum designed with industry relevance and academic standards.

INDUSTRY EXPOSURE

Live projects, internships, industry visits and mentorship from sector experts.

INNOVATION MINDSET

Labs, hackathons and innovation challenges that encourage curiosity and creativity.

LEADERSHIP DEVELOPMENT

Leadership programmes, peer learning and opportunities to lead with impact.

GLOBAL PERSPECTIVE

International exposure, cross-cultural learning and a truly global outlook.

WELLBEING SUPPORT

Wellbeing resources and support systems for a healthy mind and body.

STUDENT EXPERIENCE HIGHLIGHTS

CLUBS & COMMUNITIES

Engage in diverse clubs and communities that match your interests and passions.

MENTORSHIP

One-on-one guidance from faculty, industry leaders and alumni mentors.

INTERNATIONAL OPPORTUNITIES

Exchange programmes, global competitions and immersive international experiences.

SOCIAL IMPACT

Community engagement initiatives that build empathy and social responsibility.

EVENTS & CULTURE

Cultural festivals, guest sessions and events that celebrate diversity and creativity.

SPORTS & FITNESS

Sports facilities and fitness activities to promote a balanced and active lifestyle.

THE 4PL ACADEMY EXPERIENCE

LEARNING THAT TRANSFORMS LIVES.

At 4PL Academy, we believe that true education goes beyond knowledge — it shapes character, builds capability and creates confident, future-ready professionals.

Our learning environment is dynamic, inclusive and collaborative — designed to inspire curiosity, innovation and leadership.

THE 4PL ADVANTAGE

Industry-Aligned Learning
Curriculum designed with industry insights to ensure real-world relevance.

Innovation Driven
Encouraging creativity, problem-solving and entrepreneurial thinking.

Collaborative Community
A diverse peer group where ideas, cultures and perspectives thrive.

Leadership Development
Building confident leaders with strong communication and team capabilities.

Wellbeing Matters
Comprehensive support systems for mental, emotional and physical wellness.

Global Mindset
Preparing you to lead and succeed in a connected world.

A GLOBAL OUTLOOK

CULTURAL DIVERSITY
Learn in a diverse environment that respects different cultures, ideas and backgrounds.

INTERNATIONAL EXPOSURE
Gain opportunities for global mobility, exchange programmes and international academic collaborations.

GLOBAL NETWORK
Connect with peers, mentors and professionals from around the world.

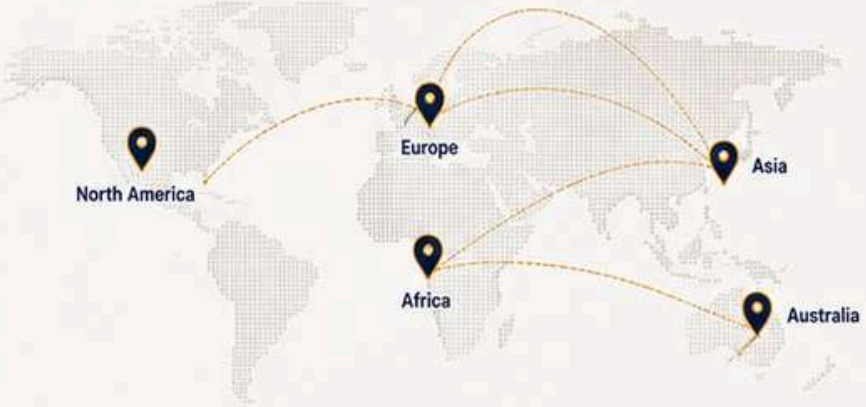

GLOBAL CAREERS
Prepare for global careers with international skills, exposure and confidence.

FUTURE READY
Develop a global perspective to navigate and lead in an ever-changing world.

COLLABORATIONS THAT CREATE GLOBAL IMPACT

We collaborate with universities, industry partners, research organisations and professional bodies worldwide to bring the best learning experiences to our students.

Stronger partnerships. Broader opportunities. Greater impact.

OUR SCHOOLS & PROGRAMMES

Choose Your Future

The world of work is becoming increasingly interconnected. Business leaders need to understand AI. Technology professionals need business awareness. Engineers need cloud and automation skills. Global trade professionals need digital capabilities and regulatory knowledge.

Different Programmes.
One Philosophy. Creating Future-Ready Global Professionals.

SCHOOL OF
ARTIFICIAL INTELLIGENCE & BUSINESS

Where Business Meets Artificial Intelligence

Prepares students to understand how AI, data, automation and digital technologies are transforming organisations. Students combine management, strategy, finance, marketing and entrepreneurship with AI-enabled decision-making, digital transformation and human–AI collaboration.

- **BBA in AI Business & Digital Transformation** — 3 Years
- **MBA in AI Business Strategy & Digital Transformation** — 2 Years

SCHOOL OF
INTELLIGENT COMPUTING

Building the Intelligent Digital World

Combines Artificial Intelligence, cloud computing, cybersecurity and modern software development to prepare students for intelligent, connected and secure digital systems.

- **BCA (Hons.) in AI, Cloud Computing & Cybersecurity** — 4 Years

SCHOOL OF
ENGINEERING & EMERGING TECHNOLOGIES

Engineering the Technologies of Tomorrow

Prepares students to work at the intersection of engineering and advanced digital technologies, progressing from engineering foundations towards AI, cloud engineering, DevOps, automation and enterprise infrastructure.

- **B.Tech (Hons.) in Artificial Intelligence, Cloud Engineering & DevOps** — 4 Years

SCHOOL OF
GLOBAL TRADE, LOGISTICS & SUPPLY CHAIN

Connecting Business Across Borders

Brings together international trade regulations, customs, compliance, logistics networks and global supply chains, with practical industry perspective from the wider 4PL Consultancy ecosystem.

- **BBA in Trade Compliance & Global Logistics** — 3 Years

5 PROGRAMMES • 4 SCHOOLS • 1 IIAP PHILOSOPHY

PROGRAMME 01

BBA in AI Business & Digital Transformation

School of Artificial Intelligence & Business

3 Years • 6 Semesters | Industry Integrated Undergraduate Programme

Business Education for the AI Economy

Artificial Intelligence is transforming almost every function of business—from marketing and finance to operations, customer experience, human resources and strategic decision-making. The BBA in AI Business & Digital Transformation is designed for students who want to understand business while developing the technological awareness required to succeed in an AI-enabled economy.

Students build strong foundations in management, marketing, finance, economics and entrepreneurship while learning how Artificial Intelligence, analytics, automation and digital technologies are changing the way organisations operate and compete.

The objective is not to turn business students into software engineers. It is to develop business professionals who understand how to work with AI, make better decisions with technology and lead digital transformation.

AI Integrated Business Education

AI is not treated simply as one additional subject. Students explore how AI can influence marketing, finance, HR, operations, sales, strategy and customer experience, while evaluating where AI creates genuine value and where human judgement remains essential.

Human–AI Collaboration

Students learn how to combine human creativity, communication, judgement and leadership with the analytical and automation capabilities of AI, preparing them to work effectively and responsibly in AI-enabled organisations.

Digital Transformation

Students explore how AI, automation, data, digital platforms and emerging technologies can redesign operations, improve customer experiences and create new business models, alongside change management and digital strategy.

Data-Driven Business

Students develop practical understanding of business analytics, dashboards, visualisation and data-driven decision-making, with emphasis on turning information into business insight and action.

Innovation & Entrepreneurship

Students learn design thinking, innovation management, entrepreneurship and venture development, progressing from problem identification to commercially viable solutions.

Industry & Professional Readiness

IIAP™ complements academic study with industry projects, technology exposure, mentorship, professional development and workplace experience.

AI Across the Business

Marketing — AI & Customer Intelligence
AI for segmentation, personalised experiences, campaign optimisation and brand insights.

Finance — AI-Assisted Analysis
AI for forecasting, risk assessment, fraud detection, investment insights and financial planning.

HR — AI & Future Workforce
AI for talent acquisition, performance insights, learning recommendations and workforce analytics.

Operations — Automation & Intelligent Operations
AI for process automation, predictive maintenance, supply chain optimisation and operational efficiency.

Sales — CRM & Sales Intelligence
AI for lead scoring, sales forecasting, recommendations and relationship intelligence.

Strategy — AI Strategy & Competitive Advantage
AI for market intelligence, scenario analysis, planning models and strategic decision-making.

Entrepreneurship — AI-Enabled Business Models
AI for ideation, validation, MVPs, go-to-market strategy and scaling innovative ventures.

Strong Business Foundations | AI & Technology Awareness | Industry Integration & Exposure | Leadership & Career Readiness

FOUNDATION → TRANSFORMATION → LEADERSHIP

PROGRAMME 01

BBA in AI Business & Digital Transformation

School of Artificial Intelligence & Business

3 Years • 6 Semesters | Industry Integrated Undergraduate Programme

SEMESTER-WISE PROGRAMME JOURNEY

YEAR	SEMESTER	INDICATIVE MODULES
YEAR 1 FOUNDATION — Build strong academic foundations	SEMESTER 1	• Principles of Management • Financial Accounting • Business Economics • Business Communication • Business Mathematics • Environmental Studies / University Foundation Course
	SEMESTER 2	• Organisational Behaviour • Marketing Management • Business Statistics • Business Law • Computer Applications for Business • Value / Ability Enhancement Course
YEAR 2 TRANSFORMATION — Gain domain depth and technology skills	SEMESTER 3	• Human Resource Management • Financial Management • Artificial Intelligence for Business • Business Analytics & Data Visualisation • Digital Business & Transformation • Human–AI Collaboration Lab
	SEMESTER 4	• Operations Management • Research Methodology • AI in Marketing & Customer Experience • AI in Finance & Decision-Making • Intelligent Operations & Automation • Innovation & Design Thinking
YEAR 3 LEADERSHIP — Lead, innovate and create impact	SEMESTER 5	• Strategic Management • Entrepreneurship & Venture Creation • AI Business Strategy • Digital Leadership & Change Management • Global Business • Business Consulting & Industry Project
	SEMESTER 6	• Business Ethics & Corporate Governance • Responsible AI & AI Governance • Digital Business Models & Innovation • Industry Internship / Workplace Experience • AI Business Transformation Capstone • Professional & Career Development

Catalogue note: Indicative curriculum only. Final subjects, electives, credits and programme requirements must align with the approved curriculum and regulations of the awarding/partner university and applicable regulatory framework. IIAP learning complements the academic curriculum.

IIAP – INDUSTRY INTEGRATED ACADEMIC PROGRAMME

Industry Projects
Work on real business challenges and applied projects.

Mentorship
Learn from industry experts and academic leaders.

Technology Exposure
Hands-on exposure to AI tools, platforms and emerging technologies.

Professional Skills
Build communication, leadership, analytics and business skills.

Workplace Experience
Internships, live projects and industry interactions.

Career Readiness
Career guidance, interview readiness and placement support.

CAREER PROGRESSION PATHWAYS

BUSINESS ASSOCIATE
0 – 2 Years

Example Roles
- Business Analyst
- Marketing Executive
- Operations Executive
- Data Analyst (Entry Level)

ANALYST / SPECIALIST
2 – 4 Years

Example Roles
- Business Analyst
- Data Analyst
- Financial Analyst
- Marketing Analyst
- HR Analyst

MANAGER / FUNCTION LEAD
4 – 7 Years

Example Roles
- Marketing Manager
- Operations Manager
- Finance Manager
- Analytics Manager
- Product Manager

STRATEGY / TRANSFORMATION LEAD
7 – 12 Years

Example Roles
- Strategy Consultant
- Digital Transformation Lead
- Business Intelligence Lead
- AI Business Solutions Lead

BUSINESS LEADER
12+ Years

Example Roles
- Business Head
- Chief Operating Officer
- Chief Digital Officer
- Entrepreneur / Founder

"From strong foundations to leadership impact — your journey with AI."

PROGRAMME 02

MBA in AI Business Strategy & Digital Transformation

School of Artificial Intelligence & Business

2 Years · 4 Semesters | Postgraduate

Lead AI. Transform Business. Create the Future.

Designed for graduates and emerging professionals who want to understand how organisations can use Artificial Intelligence, data and digital technologies to create competitive advantage. The programme develops managers, strategists and business leaders who can identify, evaluate, implement and lead AI-enabled transformation rather than training AI developers.

AI for Business Leadership

Use AI to improve decision-making, productivity, customer experience and organisational performance, with emphasis on strategic value rather than coding.

AI Business Strategy

Build AI strategy, identify high-value use cases and understand how AI influences business models, products, services and industries.

Digital Transformation

Explore process redesign, automation, organisational change, technology adoption and transformation strategy.

Data-Driven Decision Making

Develop business analytics, dashboards, performance measurement and decision-intelligence capabilities.

Human–AI Leadership

Understand how leaders manage people, technology and intelligent systems, including workforce transformation, change management and responsible AI.

Consulting, Innovation & Enterprise

Apply learning through consulting challenges, innovation exercises, industry projects and capstone work.

AI Across the Business

Marketing — AI & Customer Intelligence
Customer segmentation, sentiment analysis, personalisation and campaign optimisation.

Finance — AI-Assisted Analysis
Forecasting, risk assessment, fraud detection, investment insights and scenario analysis.

HR — AI & Future Workforce
Talent analytics, workforce planning, performance insights and employee experience.

Operations — Automation & Intelligent Operations
Process automation, predictive maintenance, supply chain optimisation and operational efficiency.

Sales — CRM & Sales Intelligence
Lead scoring, pipeline forecasting, recommendations and customer lifetime value.

Strategy — AI Strategy & Competitive Advantage
Market intelligence, scenario planning, competitive analysis and strategic decision-making.

Entrepreneurship — AI-Enabled Business Models
Opportunity discovery, MVP validation, growth strategy and scaling innovation.

Build Strategic Thinking. Lead Transformation. Drive Impact with AI.

Strategic Leadership
Develop the mindset to lead AI-powered organisations.

Industry Integration
Learn through real business challenges, projects and exposure.

Future-Ready Skills
Strengthen analytics, innovation, digital and leadership capabilities.

Global Perspective
Understand global business models, markets and trends.

PROGRAMME 02

MBA in AI Business Strategy & Digital Transformation

School of Artificial Intelligence & Business

2 Years • 4 Semesters | Postgraduate

SEMESTER-WISE PROGRAMME JOURNEY

YEAR	SEMESTER	INDICATIVE MODULES
YEAR 1 MANAGEMENT FOUNDATION — Build strong management foundations	SEMESTER 1	• Management Principles & Organisational Behaviour • Managerial Economics • Accounting & Financial Management • Marketing Management • Business Statistics & Analytics • Business Communication / University Core
YEAR 1 MANAGEMENT + AI — Integrate management with AI awareness	SEMESTER 2	• Human Resource Management • Operations & Supply Chain Management • Business Research Methods • Strategic Management • AI for Business Leaders • Digital Business & Transformation
YEAR 2 AI STRATEGY — Develop AI strategy and decision intelligence	SEMESTER 3	• AI Business Strategy • Business Analytics & Decision Intelligence • Digital Transformation Strategy • Human–AI Leadership & Future of Work • Innovation & Digital Business Models • Consulting / Live Industry Project
YEAR 2 ENTERPRISE TRANSFORMATION — Lead enterprise transformation and innovation	SEMESTER 4	• Enterprise AI & Intelligent Automation • Responsible AI, Governance & Ethics • Digital Leadership & Change Management • AI Entrepreneurship & Venture Innovation • Industry Internship / Consulting Project • AI Business Transformation Capstone

Catalogue note: Indicative curriculum only. Final subjects, electives, credits and programme requirements must align with the approved curriculum and regulations of the awarding/partner university and applicable regulatory framework. IIAP™ learning complements the academic curriculum.

CAREER PATHWAYS

AI Strategy Consultant | Digital Transformation Consultant | Business Transformation Manager | Strategy Manager | Product Manager | Business Analytics Manager | Innovation Manager | Management Consultant | Digital Business Manager | Entrepreneur

Think Strategically. | Lead Boldly. | Transform with AI.

STRATEGIC MINDS. INTELLIGENT SYSTEMS. IMPACTFUL LEADERS.

PROGRAMME 03

BCA (Hons.) in AI, Cloud Computing & Cybersecurity

School of Intelligent Computing

4 Years | 8 Semesters | Undergraduate Honours

Build Intelligent Applications. Secure Digital Enterprises.

A premium, industry-integrated computing degree combining computer applications and software development with Artificial Intelligence, Cloud Computing and Cybersecurity. Students progress from core computing foundations to developing AI-enabled applications, working with cloud environments and building secure digital solutions.

Intelligent Applications | Cloud Computing | Cyber Security | AI & Machine Learning | Enterprise Readiness

AI-First Computing

Progress from programming and computing fundamentals into AI, machine learning and Generative AI, with practical application and responsible-use awareness.

Cloud-Native Skills

Gain exposure to cloud concepts, architecture, computing, storage, networking, databases and deployment.

Cybersecurity Built In

Develop a security-first mindset through cybersecurity fundamentals, network security, identity and access management, ethical security practices, cloud security and cyber risk.

Modern Software Development

Build programming, database, web, API and software-engineering foundations, progressing to version control, full-stack development, cloud deployment and AI-assisted development.

DevOps & Automation

Explore Git, CI/CD, containers, Docker, cloud deployment, automation and introductory DevOps practices.

Industry & Professional Readiness

Complement academics with labs, industry projects, certification pathways, hackathons, internships and capstone projects.

Why BCA (Hons.) in AI, Cloud Computing & Cybersecurity?

Future-Ready Skills
Combines AI, cloud and cybersecurity—three of the most in-demand domains of the decade.

Hands-On Learning
Practical labs, real-world projects, coding practice and industry-focused learning.

Industry Integrated
Industry projects, hackathons, expert sessions, certifications and internship opportunities.

Secure by Design
Security awareness and cybersecurity foundations embedded across the programme.

Strong Career Outcomes
Prepare for roles in software development, cloud operations, AI applications and cybersecurity.

Honours Advantage
Honours pathway with research exposure, innovation projects and advanced specialisation.

TECHNOLOGY JOURNEY

PROGRAMMING → FULL-STACK → AI → CLOUD → CYBERSECURITY → DEVOPS → ENTERPRISE COMPUTING

POTENTIAL EXPOSURE

Python Java	JavaScript SQL	Git / GitHub Linux	Microsoft Azure AWS	Docker Kubernetes	APIs Generative AI	Cybersecurity Labs

Catalogue note: Indicative curriculum only. Final subjects, electives, credits and programme requirements must align with the approved curriculum and regulations of the awarding/partner university and applicable regulatory framework. IIAP™ learning complements the academic curriculum.

PROGRAMME 03

BCA (Hons.) in AI, Cloud Computing & Cybersecurity

School of Intelligent Computing

4 Years • 8 Semesters | Undergraduate Honours

SEMESTER-WISE PROGRAMME JOURNEY

YEAR	SEMESTER	INDICATIVE MODULES
YEAR 1 FOUNDATIONS — Build strong computing fundamentals	SEMESTER 1	• Programming Fundamentals • Computer Fundamentals & Architecture • Mathematics for Computing • Digital Logic • Communication Skills • University Foundation / Ability Enhancement Course
	SEMESTER 2	• Object-Oriented Programming • Data Structures • Database Management Systems • Operating Systems Fundamentals • Web Technologies • Environmental / University Foundation Course
YEAR 2 APPLICATION DEVELOPMENT — Build and apply development skills	SEMESTER 3	• Python Programming • Advanced Data Structures & Algorithms • Computer Networks • Software Engineering • Full-Stack Development I • Introduction to Artificial Intelligence
	SEMESTER 4	• Advanced Database Systems • Full-Stack Development II • Cloud Computing Fundamentals • Cybersecurity Fundamentals • Data Analytics & Visualisation • Generative AI & AI-Assisted Development
YEAR 3 SPECIALISATION — Specialise in AI, Cloud and Security technologies	SEMESTER 5	• Machine Learning Fundamentals • Cloud Architecture & Services • Network & Cloud Security • DevOps Fundamentals • API & Microservices Development • Industry Technology Project
	SEMESTER 6	• Applied Artificial Intelligence • Ethical Hacking & Security Operations • Cloud Application Development • Containers & Kubernetes • CI/CD & Automation • Industry Internship / Applied Project
YEAR 4 HONOURS — Advance, innovate and lead enterprise solutions	SEMESTER 7	• Advanced AI & Intelligent Applications • Cloud Security & Identity Management • DevSecOps • AI Agents & Intelligent Automation • Emerging Technologies • Research / Innovation Project
	SEMESTER 8	• Enterprise AI Solutions • Advanced Cloud & Platform Engineering • Cyber Risk, Governance & Compliance • Responsible AI & Technology Ethics • Industry Internship / Professional Practice • Honours Capstone Project

Catalogue note: Indicative curriculum only. Final subjects, electives, credits and programme requirements must align with the approved curriculum and regulations of the awarding/partner university and applicable regulatory framework. IIAP™ learning complements the academic curriculum.

TECHNOLOGY JOURNEY

PROGRAMMING → FULL-STACK DEVELOPMENT → AI & MACHINE LEARNING → CLOUD COMPUTING → CYBERSECURITY → DEVOPS & AUTOMATION → ENTERPRISE COMPUTING

POTENTIAL EXPOSURE

Python | Java | JavaScript | SQL | Git / GitHub | Linux | Azure | AWS | Docker | Kubernetes | Generative AI | Cybersecurity Labs

PROJECT-BASED LEARNING
Real-world projects, labs and capstones across all semesters.

CERTIFICATION PATHWAYS
Industry-relevant certifications to boost career readiness.

INDUSTRY INTEGRATED
Internships, live projects, mentorship and expert interactions.

FUTURE-READY CAREER
In-demand skills for AI, cloud, cybersecurity and enterprise roles.

BUILD INTELLIGENT APPLICATIONS. SECURE DIGITAL ENTERPRISES. LEAD THE FUTURE.

PROGRAMME 04

B.Tech (Hons.) in Artificial Intelligence, Cloud Engineering & DevOps

School of Engineering & Emerging Technologies

4 Years | 8 Semesters | Undergraduate Honours

Build Intelligent Systems. Deploy at Scale.

An industry-integrated engineering programme combining core engineering and computer science foundations with progressive specialisation in Artificial Intelligence, cloud engineering, DevOps, cybersecurity, automation and enterprise infrastructure.

Artificial Intelligence & Machine Learning

Develop foundations in AI and machine learning before progressing towards intelligent applications, Generative AI and applied AI solutions.

Cloud Engineering

Treat cloud as an engineering discipline: architecture, networking, storage, compute, identity, security and scalable infrastructure.

DevOps & Automation

Learn version control, CI/CD, containers, Infrastructure as Code, automation and modern deployment practices.

MLOps & Intelligent Infrastructure

Explore AI deployment, monitoring, automation and scalable AI infrastructure as intelligent systems move into production.

Cybersecurity & Cloud Security

Develop awareness of network security, identity, access management, cloud security and secure development practices.

Enterprise & Industry Readiness

Complement engineering with labs, certification preparation, industry projects, professional development and capstone work.

ENGINEER THE FUTURE

Build at Scale
Design and build systems that can scale to millions of users and workloads.

Automate Everything
Use DevOps, automation and IaC to deliver faster, safer and smarter.

Intelligent by Design
Integrate AI and data into applications and infrastructure from the ground up.

Secure by Default
Build systems with security, identity and compliance at the core.

Cloud Native
Architect, deploy and operate modern cloud solutions efficiently.

Industry Ready
Work on real-world projects, internships and capstones with industry mentorship.

TECHNOLOGY JOURNEY

PROGRAMMING → SOFTWARE ENGINEERING → CLOUD COMPUTING → DEVOPS & AUTOMATION → ARTIFICIAL INTELLIGENCE → MLOPS & DEPLOYMENT → PLATFORM ENGINEERING

POTENTIAL EXPOSURE

Python | Java | C++ | JavaScript | SQL | Git / GitHub | Linux | Docker | Kubernetes | AWS | Azure

Catalogue note: Indicative curriculum only. Final subjects, electives, credits and programme requirements must align with the approved curriculum and regulations of the awarding/partner university and applicable regulatory framework. IIAP™ learning complements the academic curriculum.

PROGRAMME 04

B.Tech (Hons.) in Artificial Intelligence, Cloud Engineering & DevOps

School of Engineering & Emerging Technologies

4 Years | 8 Semesters | Undergraduate Honours

"Engineering the future with AI. Building what scales. Deploying what matters."

SEMESTER-WISE PROGRAMME JOURNEY

YEAR	SEMESTER	INDICATIVE MODULES
YEAR 1 ENGINEERING FOUNDATIONS Build strong engineering fundamentals	SEMESTER 1	• Engineering Mathematics • Engineering Physics / Chemistry • Programming Fundamentals • Basic Electrical / Electronics Engineering • Engineering Graphics / Workshop • Communication / University Foundation Course
	SEMESTER 2	• Engineering Mathematics II • Object-Oriented Programming • Data Structures Fundamentals • Digital Systems • Environmental / Universal Human Values • Engineering / University Core
YEAR 2 COMPUTING & CLOUD Build computing expertise and cloud foundations	SEMESTER 3	• Data Structures & Algorithms • Database Management Systems • Computer Networks • Operating Systems • Software Engineering • Cloud Computing Fundamentals
	SEMESTER 4	• Design & Analysis of Algorithms • Advanced Databases • Cloud Architecture & Services • DevOps Fundamentals • Cybersecurity Fundamentals • Introduction to Artificial Intelligence
YEAR 3 AI, CLOUD & DEVOPS Specialise in AI, Cloud Engineering and DevOps	SEMESTER 5	• Machine Learning • Cloud Engineering • Containers & Kubernetes • Infrastructure as Code • CI/CD & Automation • Industry Technology Project
	SEMESTER 6	• Applied Artificial Intelligence • Advanced Cloud Architecture • DevSecOps • Cloud Security • MLOps Fundamentals • Industry Internship / Applied Project
YEAR 4 ENTERPRISE ENGINEERING Build, scale and deliver enterprise-grade solutions	SEMESTER 7	• Generative AI & Intelligent Systems • Advanced DevOps & Platform Engineering • MLOps & AI Deployment • Enterprise Cloud Architecture • Site Reliability Engineering • Research / Innovation Project
	SEMESTER 8	• Enterprise AI Solutions • Cloud Governance & FinOps • Advanced Automation • Responsible AI & Technology Governance • Industry Professional Practice • Major Engineering Capstone

Catalogue note: Indicative curriculum only. Final subjects, electives, credits and programme requirements must align with the approved curriculum and regulations of the awarding/partner university and applicable regulatory framework. IIAP™ learning complements the academic curriculum.

CAREER PATHWAYS

- AI / Machine Learning Engineer
- Cloud Engineer / Solutions Architect
- DevOps / Site Reliability Engineer
- Cloud Security / DevSecOps Engineer
- Platform / Infrastructure Engineer
- Data / MLOps Engineer
- Technology Consultant / Solutions Architect

HANDS-ON LEARNING
Labs, industry tools, real-world projects across all semesters.

INDUSTRY INTEGRATED
Internships, case studies, guest sessions and industry mentorship.

CERTIFICATION PATHWAYS
Focused preparation for in-demand cloud, AI and DevOps certifications.

RESEARCH & INNOVATION
Work on research, innovation challenges and publishing opportunities.

FUTURE-READY ENGINEER
Build systems. Automate. Innovate. Lead the future.

ENGINEER INTELLIGENCE. AUTOMATE EVERYTHING. SCALE WITHOUT LIMITS.

PROGRAMME 05

BBA in Trade Compliance & Global Logistics

School of Global Trade, Logistics & Supply Chain

3 Years | 6 Semesters | Undergraduate

Every product that crosses an international border moves through a complex ecosystem of trade regulations, customs procedures, logistics networks, freight operations, documentation, supply chains and compliance requirements. This programme combines core business education with specialised learning in international trade, customs, trade compliance, logistics, freight, supply chain operations, procurement and digital trade.

GLOBAL PERSPECTIVE | TRADE COMPLIANCE | SMART LOGISTICS | DATA-DRIVEN DECISIONS

Trade Compliance

Understand trade regulations, import/export controls, product classification, origin, documentation and compliance processes as a professional discipline.

Customs & International Trade

Explore customs processes, tariff classification, valuation, country of origin, Incoterms®, import/export documentation and Free Trade Agreements.

Global Logistics

Understand air, ocean, road and multimodal logistics, warehousing, distribution and freight forwarding.

Supply Chain Management

Explore procurement, sourcing, inventory, demand planning, supplier management, warehousing, distribution and resilient/sustainable supply chains.

Digital Trade & AI-Enabled Logistics

Understand how AI, automation, analytics, digital platforms, control towers and enterprise systems improve visibility, planning, compliance and decision-making.

Industry-Integrated Learning

Connect academic study with industry case studies, logistics simulations, trade-documentation exercises, professional masterclasses, workplace projects and internships.

YOUR ROLE IN GLOBAL COMMERCE

This programme prepares future professionals who keep global trade moving — compliant, efficient and sustainable.

SUPPLIER → PROCUREMENT → EXPORT COMPLIANCE → CUSTOMS → INTERNATIONAL FREIGHT → IMPORT COMPLIANCE → WAREHOUSING → CUSTOMER

POWERED BY | DATA | DOCUMENTATION | COMPLIANCE | TECHNOLOGY | VISIBILITY

Catalogue note: Indicative curriculum only. Final subjects, electives, credits and programme requirements must align with the approved curriculum and regulations of the awarding/partner university and applicable regulatory framework. IIAP™ learning complements the academic curriculum.

PROGRAMME 05

BBA in Trade Compliance & Global Logistics

School of Global Trade, Logistics & Supply Chain

3 Years | 6 Semesters | Undergraduate

SEMESTER-WISE PROGRAMME JOURNEY

YEAR	SEMESTER	INDICATIVE MODULES
YEAR 1 BUSINESS FOUNDATIONS — Build strong business fundamentals	SEMESTER 1	• Principles of Management • Financial Accounting • Business Economics • Business Communication • Business Mathematics • University Foundation / Environmental Course
	SEMESTER 2	• Organisational Behaviour • Marketing Management • Business Statistics • Business Law • Computer Applications for Business • Value / Ability Enhancement Course
YEAR 2 GLOBAL TRADE & LOGISTICS — Understand trade flows, logistics operations and customs processes	SEMESTER 3	• International Business • Fundamentals of Global Trade • International Logistics Management • Customs & Import/Export Procedures • Freight & Transportation Management • Trade Documentation Lab
	SEMESTER 4	• Operations Management • Supply Chain Management • Tariff Classification, Valuation & Origin • Incoterms® & International Contracts • Warehousing & Distribution Management • Digital Logistics & Supply Chain Analytics
YEAR 3 COMPLIANCE & SUPPLY CHAIN — Specialise in compliance, strategy and global supply chain	SEMESTER 5	• Strategic Management • Trade Compliance Management • Export Controls & International Trade Regulations • Procurement & Global Sourcing • Free Trade Agreements & Rules of Origin • Industry Trade & Logistics Project
	SEMESTER 6	• Business Ethics & Corporate Governance • Global Supply Chain Strategy • AI & Automation in Logistics • Sustainable Trade, ESG & Emerging Regulations • Industry Internship / Workplace Experience • Global Trade & Logistics Capstone

Catalogue note: Indicative curriculum only. Final subjects, electives, credits and programme requirements must align with the approved curriculum and regulations of the awarding/partner university and applicable regulatory framework. IIAP™ learning complements the academic curriculum.

CAREER PATHWAYS

- Trade Compliance Executive
- Customs & Documentation Specialist
- Logistics & Freight Coordinator
- Supply Chain Analyst
- Procurement & Sourcing Executive
- International Trade Executive
- Export / Import Operations Manager
- Global Trade Consultant

WHY THIS PROGRAMME MATTERS

Global Relevance
Essential for careers in international trade, logistics, compliance and supply chains.

Compliance-First Mindset
Build expertise in trade regulations, customs procedures and risk mitigation.

Industry-Integrated Learning
Hands-on projects, simulations, masterclasses and industry immersion.

Digital & AI Advantage
Use technology, analytics and AI to improve visibility and decisions.

Sustainable Future
Drive responsible, ethical and sustainable global trade and logistics.

Future-Ready Careers
High-growth roles in enterprises, logistics firms and global trade organisations.

DATA • DOCUMENTATION • COMPLIANCE • TECHNOLOGY • VISIBILITY

POWERING GLOBAL COMMERCE.
DELIVERING GLOBAL IMPACT.

PROFESSIONAL & INDUSTRY CERTIFICATIONS

Graduate With More Than a Degree

Alongside their academic programme, students can have opportunities to develop industry-recognised skills, professional certifications and CPD-certified learning relevant to their chosen career pathway.

DEGREE + INDUSTRY SKILLS + PROFESSIONAL CERTIFICATIONS = A CV THAT STANDS OUT

CPD-CERTIFIED LEARNING

The CPD Certification Service

Selected 4PL Academy professional-development modules can be designed for CPD certification/accreditation, subject to relevant course approval. Potential areas include:

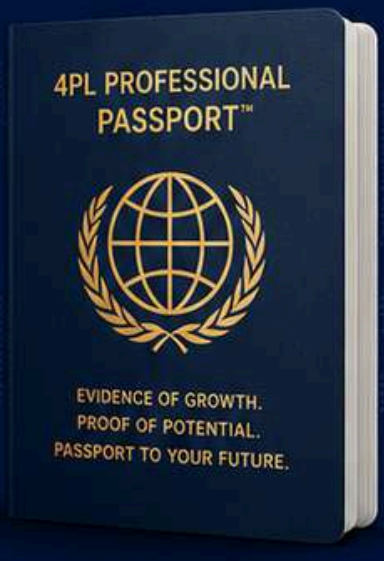

- Generative AI for Professionals
- AI Productivity & Prompt Engineering
- Human–AI Collaboration
- Digital Transformation Fundamentals
- Business Analytics & Decision Making
- Professional Communication & Leadership
- Entrepreneurship & Innovation
- Project Management Fundamentals
- International Trade Compliance Fundamentals
- Global Logistics & Supply Chain Fundamentals

4PL PROFESSIONAL PASSPORT

Every student progressively builds a professional portfolio bringing together multiple pillars of learning and experience.

ACADEMIC DEGREE + IIAP LEARNING + CPD LEARNING + TECHNOLOGY CERTIFICATIONS + INDUSTRY CERTIFICATIONS

+ LIVE PROJECTS + INTERNSHIP / WORKPLACE EXPERIENCE + GLOBAL EXPOSURE

EVIDENCE OF WHAT YOU KNOW. WHAT YOU CAN DO. AND WHERE YOU'VE BEEN.

Important disclaimer: Professional certifications and CPD learning opportunities vary by programme and are subject to awarding-body requirements, approved training-provider arrangements, availability and programme structure. Certification names represent potential pathways and do not imply that 4PL Academy is an authorised training or awarding partner unless separately confirmed.

PROFESSIONAL & INDUSTRY CERTIFICATIONS

Programme-Specific Pathways

Industry-relevant skills. Professional certifications. Career-ready you.

CHOOSE YOUR PROGRAMME. BUILD YOUR ADVANTAGE.

BBA AI BUSINESS (3 Years)

- AI fundamentals
- Power BI / Data Analytics
- Generative AI for Business
- Digital Transformation
- Agile / Project Management
- Lean Six Sigma Foundation
- CRM Fundamentals
- CPD: Human–AI Collaboration

KEY FOCUS AREAS

Business intelligence, AI-enabled decision making, customer centricity and digital transformation.

MBA AI STRATEGY (2 Years)

- AI Business Strategy
- Digital Transformation Leadership
- Business Analytics
- Agile
- Lean Six Sigma
- Responsible AI & Governance
- Change Management
- Potential: IOSH Managing Safely® (where appropriate)

KEY FOCUS AREAS

Strategic leadership, responsible AI adoption, organisational transformation and operational excellence.

BCA AI, CLOUD & CYBERSECURITY (3 Years)

- Azure / AI Fundamentals
- Cloud Practitioner Pathways
- Cybersecurity Fundamentals
- Networking
- Linux
- Git / GitHub
- Docker
- Cloud Security
- CPD: Generative AI Application Development

KEY FOCUS AREAS

Cloud computing, cybersecurity, application development and AI-enabled solutions.

B.TECH AI, CLOUD ENGINEERING & DEVOPS (4 Years)

- Azure / AWS Pathways
- Linux
- Docker
- Kubernetes
- Terraform / IaC
- DevOps / CI-CD
- Cloud Security
- MLOps
- Platform Engineering
- Site Reliability Engineering

KEY FOCUS AREAS

Engineering scalable systems, automation, AI deployment and resilient cloud infrastructure.

BBA TRADE COMPLIANCE & GLOBAL LOGISTICS (3 Years)

- International Trade Compliance
- Customs
- HS Classification
- Origin
- Incoterms®
- Export Controls
- Logistics
- Supply Chain
- Procurement
- Sustainable Trade / ESG
- Potential: IOSH / NEBOSH Pathways (through appropriate approved providers)

KEY FOCUS AREAS

Global trade regulations, customs, logistics operations, supply chain strategy and responsible trade practices.

CERTIFY. APPLY. ADVANCE.

EARN CREDENTIALS
Build recognised skills through certifications and CPD learning.

APPLY IN PRACTICE
Use your skills in projects, simulations, internships and real-world scenarios.

STAY CAREER-READY
Strengthen your CV with industry-recognised certifications.

LEAD THE FUTURE
Combine academic excellence with industry relevance and impact.

Academic Excellence.
Industry Recognition.
Global Advantage.

Your Future. Our Focus.

IMPORTANT DISCLAIMER: Professional certifications and CPD learning opportunities vary by programme and are subject to awarding-body requirements, approved training-provider arrangements, availability and programme structure. Certification names represent potential pathways and do not imply that 4PL Academy is an authorised training or awarding partner unless separately confirmed.

ENTERPRISE TECHNOLOGY KIT (ETK)

Learn With the Technology Used by Modern Organisations

The Enterprise Technology Kit (ETK) is the technology layer of the IIAP experience. It brings together relevant AI tools, software platforms, cloud environments, analytics technologies, collaboration systems and specialist applications. The exact ETK differs by degree because future business leaders, cloud engineers and global trade professionals require different capabilities.

AI-ENABLED | CLOUD-FIRST | DATA-DRIVEN | SECURE | COLLABORATIVE | AUTOMATED | GLOBAL

BBA
ETK
AI Business Edition

- Generative AI & AI Assistants
- Microsoft 365 & Collaboration

- Digital Trade Tools
- AI-Assisted Analytics
- Workflow Automation

AI FOR EVERY STUDENT

01 GENERATIVE AI
Work productively with modern AI systems.

02 PROMPTING & AI COMMUNICATION
Communicate effectively with intelligent systems.

03 AI PRODUCTIVITY
Use AI to research, analyse, create and improve workflows.

04 RESPONSIBLE AI
Understand privacy, ethics, accuracy, bias and appropriate professional use.

05 HUMAN–AI COLLABORATION
Understand what humans should do, what AI can do and how the two work effectively together.

INNOVATION, ENTREPRENEURSHIP & STARTUP ECOSYSTEM

Don't Just Prepare for a Job. Prepare to Create One.

The AI revolution will not only transform existing jobs—it will create new businesses, products, services and industries. At 4PL Academy, entrepreneurship is treated as a mindset: identify problems, recognise opportunities, experiment with ideas and turn solutions into value.

DISCOVER → Identify real problems & opportunities

IMAGINE → Explore ideas, insights & possibilities

DESIGN → Design solutions & build business models

BUILD → Prototype, test & create minimum viable value

PITCH → Present, get feedback & refine your venture

LAUNCH → Go-to-market, scale & create impact

1. INNOVATION LAB — FROM PROBLEMS TO POSSIBILITIES

Students explore real-world business, technology and social challenges through innovation challenges, interdisciplinary projects and structured problem-solving. Business, technology and engineering students can collaborate around common problems.

2. DESIGN THINKING — UNDERSTAND. IMAGINE. PROTOTYPE. TEST.

Students learn EMPATHISE → DEFINE → IDEATE → PROTOTYPE → TEST, developing research, experimentation and feedback skills useful in entrepreneurship, consulting and transformation.

3. AI ENTREPRENEURSHIP — BUILD BUSINESSES FOR THE AI ECONOMY

Students explore how AI can support market research, product development, customer engagement, analytics, automation, content creation and operations, as well as entirely new AI-enabled business models.

4. STARTUP DEVELOPMENT — IDEA → BUSINESS MODEL → VENTURE

Problem Identification → Market Research → Value Proposition → Business Model → Prototype/ MVP → Go-to-Market → Financial Planning → Pitch

5. MENTORS & ENTREPRENEURS

Entrepreneurs, business leaders, technology professionals and industry specialists can contribute through masterclasses, mentoring, founder conversations and project reviews.

6. 4PL STARTUP CHALLENGE

A signature annual Academy event where interdisciplinary student teams solve a real problem or develop a venture and present to a panel of entrepreneurs, academics and industry professionals.

INTERDISCIPLINARY. COLLABORATIVE. IMPACTFUL.

Students from different programmes. One shared mission.

BBA Strategy & Business + **BCA** Coding & Applications + **B.Tech** Engineering & Technology + **BBA Trade** Global Trade & Logistics

Different skills. One venture. Infinite possibilities.

7. PITCH • BUILD • LAUNCH

PITCH — Elevator pitches, business plans, investor decks

BUILD — Product demonstrations, MVPs, prototypes

LAUNCH — Financial models, go-to-market plans

SCALE — Mentorship, funding guidance, network access

The goal is to build confidence to create, present and defend an idea.

GLOBAL INDUSTRY & ACADEMIC EXPOSURE

THE WORLD IS YOUR CLASSROOM

Students may have the opportunity to participate in an optional **Global Industry & Academic Exposure Programme** designed to combine international travel with industry visits, academic interaction, innovation, cultural experience and global networking. Destinations can vary by programme and year, with potential experiences in Dubai, Malta and selected European destinations.

DUBAI —

Business • Innovation • Technology • Global Trade

Dubai offers exposure to one of the world's most international business environments. A programme could combine visits to business districts, innovation ecosystems, technology organisations, logistics environments, universities and entrepreneurship hubs. Business students can focus on international business, entrepreneurship and digital transformation; technology students on innovation and emerging technology; trade students on Dubai's role as an international logistics and trading hub.

POTENTIAL EXPERIENCE:

Corporate Visits • Innovation Centres
University Interaction • Entrepreneurship Workshops
Global Trade & Logistics Exposure • Cultural Experience

MALTA —

European Education • Technology • Business • Culture

Malta can provide students with exposure to a European academic and professional environment within an international setting. The programme could include academic visits, technology and business interaction, workshops, professional networking and cultural learning, helping develop international confidence, cross-cultural communication and understanding of European business environments.

POTENTIAL EXPERIENCE:

University Visits • Business Workshops
Technology Exposure • Professional Networking
European Business Learning • Cultural Experience

SEE THE WORLD. UNDERSTAND THE WORLD. PREPARE TO WORK ANYWHERE IN THE WORLD.

The Global Industry & Academic Exposure Programme is optional. Destinations, duration, itinerary and activities may vary according to programme requirements, partner and industry availability, travel arrangements and visa requirements. International exposure may involve additional costs.

EUROPE —
Explore. Learn. Connect.

Selected European destinations can provide programme-specific opportunities in Artificial Intelligence, engineering, digital transformation, international business, manufacturing, logistics and global supply chains. Destinations should be selected according to academic relevance, industry opportunity and partner availability.

POTENTIAL EXPERIENCE:
Universities • Global Companies • Technology Centres • Innovation Hubs
Logistics Facilities • Industry Workshops • Cultural Exploration

MORE THAN A FOREIGN TRIP.
THIS IS THE GLOBAL INDUSTRY & ACADEMIC EXPOSURE PROGRAMME.

LEARN
Experience international universities, academic environments and specialist workshops.

EXPERIENCE
Visit companies, innovation centres and relevant industry environments.

CONNECT
Interact with students, academics, entrepreneurs and industry professionals from different backgrounds.

DISCOVER
Experience different cultures, cities and ways of living while developing independence and a global mindset.

PROGRAMME-SPECIFIC GLOBAL FOCUS

BBA AI BUSINESS
- International Business
- AI
- Entrepreneurship
- Digital Transformation

MBA AI STRATEGY
- Strategy
- Innovation
- Leadership
- Enterprise Transformation

BCA
- Technology
- Cloud
- Cybersecurity
- Innovation

B.TECH
- Engineering
- AI
- Cloud Infrastructure
- Technology

BBA TRADE
- Global Trade
- Ports/Logistics
- Customs
- Supply Chain

SEE THE WORLD. UNDERSTAND THE WORLD. PREPARE TO WORK ANYWHERE IN THE WORLD.

Global Mindset
Broader perspective. Stronger confidence.

Global Network
Build relationships that last a lifetime.

Global Readiness
Develop skills to work anywhere in the world.

Global Opportunities
More exposure. More choices. More impact.

The Global Industry & Academic Exposure Programme is optional. Destinations, duration, itinerary and activities may vary according to programme requirements, partner and industry availability, travel arrangements and visa requirements. International exposure may involve additional costs.

CAREERS & EMPLOYABILITY

From Campus to Career — Graduate Ready.

A university degree is an important academic achievement. Today's employers also look for graduates who can communicate, solve problems, work with technology, collaborate with teams, understand the workplace and demonstrate what they can actually do. Career preparation therefore grows throughout the IIAP journey.

CAREER PREPARATION THROUGH THE IIAP JOURNEY

1 CAREER READINESS FROM YEAR ONE

Students progressively develop communication, presentation, teamwork, digital productivity and professional behaviour, later moving into CV building, LinkedIn presence, interview preparation, networking and employer expectations.

2 INDUSTRY PROJECTS — SHOW WHAT YOU CAN DO

Live projects, simulations, consulting challenges, technology assignments and capstones create evidence of problem-solving, teamwork, analytical thinking and practical application.

3 INTERNSHIPS & WORKPLACE EXPERIENCE

Internships, workplace projects, industry visits, professional shadowing and employer-led assignments help students understand professional expectations, deadlines, communication, organisational structures and workplace culture.

4 PERSONAL BRAND & PROFESSIONAL PROFILE

Students can develop CVs, LinkedIn profiles, professional/project portfolios, personal introductions, interview presence and digital professional identity.

> "Employers look for potential. We help you build it."

7 4PL PROFESSIONAL PASSPORT — YOUR JOURNEY. YOUR EVIDENCE.

By graduation, the Professional Passport can bring together the academic degree, professional certifications, technology skills, industry projects, internship/workplace experience, global exposure, innovation/startup experience and professional development.

- Academic Degree
- Professional Certifications
- Technology Skills
- Industry Projects
- Internship / Workplace Experience
- Global Exposure
- Innovation / Startup Experience
- Professional Development

Ready to Work • Ready to Create • Ready to Grow

4PL Academy does not guarantee placements or employment. Our focus is on career readiness, employer engagement, demonstrable skills and meaningful professional experience.

CAREERS & EMPLOYABILITY

From Campus to Career — Graduate Ready.

A university degree is an important academic achievement. Today's employers also look for graduates who can communicate, solve problems, work with technology, collaborate with teams, understand the workplace and demonstrate what they can actually do. Career preparation therefore grows throughout the IIAP journey.

5 EMPLOYER ENGAGEMENT

Employer masterclasses, career panels, recruitment workshops, networking, company presentations and professional mentoring connect education with opportunity.

6 INTERVIEW & SELECTION PREPARATION

Aptitude preparation, group discussions, case studies, mock interviews, technical/business interviews, presentation exercises and assessment-centre preparation. AI-enabled interview practice may also be used.

WHAT EMPLOYERS VALUE

- Communication
- Problem Solving
- Teamwork
- Digital Fluency
- Professional Attitude
- Adaptability
- Initiative
- Results Orientation

POTENTIAL RECRUITERS

Building connections. Creating opportunities.

Deloitte. · TCS TATA CONSULTANCY SERVICES · Infosys · accenture · HCLTech · amazon · Microsoft · wipro · KPMG · EY Building a better working world

INDUSTRY PROJECTS & WORKPLACE EXPERIENCE

- Live Projects
- Simulations
- Consulting Challenges
- Capstone Projects

Show what you can do. Build evidence. Create impact.

PERSONAL BRAND. PROFESSIONAL PROFILE.

- CV & Resume
- LinkedIn Profile
- Portfolio
- Personal Introduction
- Interview Presence

Build your professional identity. Showcase your strengths.

> Your career is our priority.
> Your future is our purpose.

TWO PATHWAYS. ONE DESTINATION.

BUILD YOUR CAREER

- Skilled Professional
- Industry Impact
- Global Opportunities
- Lifelong Growth

4PL ACADEMY — CREATING GLOBAL PROFESSIONALS

BUILD YOUR BUSINESS

- Innovation Mindset
- Startup Ecosystem
- Mentorship & Guidance
- Funding Opportunities

4PL Professional Passport brings your journey, skills and experience together.
Your degree. Your skills. Your experiences. **Your future.**

4PL Academy does not guarantee placements or employment. Our focus is on career readiness, employer engagement, demonstrable skills and meaningful professional experience that help students create their own opportunities.

WHY 4PL ACADEMY?

One Education Ecosystem. Built for the Future.

4PL Academy brings together academic learning, industry integration, emerging technology, professional development, entrepreneurship and global exposure in one coherent student journey.

OUR DISTINCTIVE ADVANTAGES

01

A 4PL CONSULTANCY COMPANY

An education organisation connected to a real-world industry ecosystem.

02

IIAP LEARNING FRAMEWORK

Five pillars: Learn • Apply • Experience • Innovate • Lead.

03

AI & TECHNOLOGY FOR EVERY STUDENT

Technology fluency is relevant across business, computing, engineering and global trade.

04

ETK

Programme-specific enterprise technology exposure aligned to future careers.

05

PROFESSIONAL & INDUSTRY CERTIFICATIONS

Opportunities to build professional capabilities alongside the degree.

> One ecosystem.
> Multiple advantages.
> Limitless possibilities.

06

4PL PROFESSIONAL PASSPORT

A portfolio of evidence showing what students know, can do and have experienced.

07

INDUSTRY PROJECTS & MENTORSHIP

Practical challenges, masterclasses, professionals and workplace exposure.

ACADEMICALLY STRONG. TECHNOLOGICALLY FLUENT.
INDUSTRY EXPERIENCED. GLOBALLY READY.

WHY 4PL ACADEMY?

One Education Ecosystem. Built for the Future.

4PL ACADEMY
CREATING GLOBAL PROFESSIONALS

08 INNOVATION & ENTREPRENEURSHIP

Innovation Lab, AI entrepreneurship and the 4PL Startup Challenge.

09 GLOBAL EXPOSURE

Optional Dubai, Malta and selected European academic/ industry experiences.

10 CAREER READINESS

Professional development begins from Day One.

THE IIAP LEARNING FRAMEWORK

LEARN	APPLY	EXPERIENCE	INNOVATE	LEAD
Strong academic foundation	Apply knowledge to real situations	Industry exposure and real-world practice	Create solutions. Use emerging technology	Build leadership. Make an impact

GLOBAL INDUSTRY & ACADEMIC EXPOSURE PROGRAMME

International exposure. Industry interaction.
Global perspective.

DUBAI
Business • Innovation
Technology • Global Trade

MALTA
European Education
Technology • Business • Culture

EUROPE
Explore. Learn. Connect.
Innovation • Industry • Culture

ETK – ENTERPRISE TECHNOLOGY KNOWLEDGE

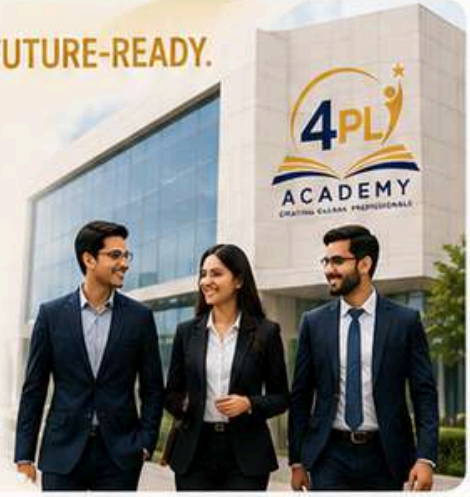

Programme-specific enterprise technology exposure aligned to future careers.

Cloud Computing	Data Analytics	Cyber Security	AI / Machine Learning	ERP & Business Systems	Automation & Emerging Tech

CAREER-READY. FUTURE-READY.

- Academic Excellence
- Industry Integration
- Technology Fluency
- Practical Experience
- Global Exposure
- Professional Growth
- Entrepreneurial Mindset
- Leadership Development

★ ACADEMICALLY STRONG. TECHNOLOGICALLY FLUENT.
INDUSTRY EXPERIENCED. GLOBALLY READY. ★

ADMISSIONS & YOUR APPLICATION JOURNEY

4PL ACADEMY
CREATING GLOBAL PROFESSIONALS

Your Journey Starts Here

The Master Catalogue should keep admissions information general so it can work across university partners and intakes. Programme-specific eligibility, entry criteria, documentation, dates and university requirements should be confirmed at the point of application.

01 EXPLORE
Discover 4PL Academy schools, programmes and career pathways.

02 CHOOSE
Select the programme that best matches your interests, strengths and future ambitions.

03 CHECK ELIGIBILITY
Review the applicable academic and university entry requirements with the admissions team.

04 COUNSELLING
Discuss programme structure, IIAP™ experience, progression and career opportunities.

05 APPLY
Complete the required application and submit the necessary documents.

06 UNIVERSITY ADMISSION
Application is processed in accordance with the partner/awarding university's admissions requirements.

07 BEGIN YOUR IIAP JOURNEY
Join 4PL Academy and start to
Learn • Apply • Experience • Innovate • Lead.

Eligibility, admissions requirements, academic criteria, programme availability and intake dates may vary by programme and partner/awarding university. Final admission is subject to the applicable university and regulatory requirements.

SPEAK TO ADMISSIONS
Our team is here to guide you at every step.

CHECK CURRENT ELIGIBILITY
Connect with us to understand your programme options.
